DIALOG Services

At 242 metres, Brookfield Place Calgary is the tallest building in the city and a signature addition to the Calgary skyline. The building is wrapped in a smooth, frameless, high efficiency curtain wall with a high proportion of vision panel glazing permitting ample natural light, maximizing views and creating a clean architectural expression. The glazing helps reduce the environmental and economic impacts associated with excessive energy use. The sunlit public plaza anchoring the two towers is unprecedented in Calgary at more than half an acre. Enhancing this huge public space is a 4,645 square metre glazed urban pavilion that embraces the plaza while enclosing an internal civic square connected to the +15 network.
