The new Calgary Cancer Centre will centralize treatment and care for cancer patients in southern Alberta. Symbolizing the type of care a patient can expect to receive, the design features two curving L-shaped forms that come together in an embrace surrounding an all-season garden as the “heart,” providing year-round access and views to nature for patients and their families.

DIALOG, in collaboration with Stantec, is responsible for the architectural and interior design as well as structural, mechanical and electrical engineering. DIALOG is also providing landscape architecture, planning and urban design.
MEET THE TEAM

Adrian Lao
Principal, Architecture

Diego Morettin
Principal, Architecture

Michele Sigurdson
Principal, Interior Design

Lynn Webster
Partner Emerita, Architecture

Ralph Hildenbrandt
Principal, Structural Engineering

Jim Montgomery
Partner Emeritus, Structural Engineering

Grant Kidd
Principal, Mechanical Engineering

Rob Adamson
Principal, Architecture

Henry Doornberg
Principal, Electrical Engineering

Steven Oosterhof
Principal, Structural Engineering

Chris Lenzin
Principal, Structural Engineering

Juan Carlos
Portuese
Associate, Architecture
