Gaming company office designs are typically loud and busy, but not Capcom's Vancouver headquarters. Capcom wanted a refined space that offered moments of reflection, where visitors and employees could be inspired by the company's legacy but still inspired to grow into the future. 'CapCalm', an homage to the company's Japanese roots, was born, providing a meditative response to the maturing industry and the creative team's need for a little Zen amidst the stressful world of video game animation.

Meet The Team
