Lundholm Associates

### DIALOG SERVICES

Architecture

Electrical Engineering

Interior Design

Landscape Architecture

Mechanical Engineering

Planning & Urban Design

Structural Engineering

By capturing and expressing Alberta's history, landscapes, and promising potential, the Royal Alberta Museum's new signature building engages the public and changes our perception of the museum.

The design concept begins from a deep understanding of the Royal Alberta Museum ("RAM"), the province, and the site. The architecture gives primacy to the stories and the objects of the museum. The engineering responds to this vision, creating a museum that is sustainable, contributes to a vibrant downtown, is well designed, and fully accessible. It is a place to explore and connect—to Alberta, to ideas, to people.
